

TRAINING COURSE IN CPPPMT3006 MANAGE PESTS BY APPLYING PESTICIDES

TRAINING COURSE TO APPLY FOR PROVISIONAL PEST OPERATORS LICENCE WITH THE DEPARTMENT OF HEALTH (WA)

SELF PACED LEARNING

COURSE CONTENT

This unit of competency specifies the outcomes required to apply pesticides safely and efficiently and according to directions on manufacturers' labels in order to manage non-timber pests in residential, commercial and industrial premises.

The unit covers assessing the nature and extent of the pest and pest activity, and gaining a thorough understanding of client requirements and company information, in order to manage the pest problem. The selection of appropriate equipment, pesticides and methods is essential for performing the task safely and efficiently.

The unit supports pest management technicians responsible for applying pesticides that may affect public health, work health and safety, and the amenity of the community and the environment.

Participants will gain the skills and knowledge to competently:

1. Inspect work site and identify pests and pest activity.
2. Develop and discuss pest management plan with client.
3. Prepare work site for pest management.
4. Select and prepare equipment and pesticides required to implement pest management plan.
5. Apply pesticides.
6. Finalise work and complete documentation.
7. Clean, safety check and store equipment.

This course includes a very important component on pesticide safety and risk management.

PREREQUISITES

Participants are to be medically fit to handle registered pesticides and must be over 18 years of age.

DELIVERY

Self paced learning

This program involves self paced/remote learning, individual assessment tasks and workplace assignments.
